The Programs (which include both the software and documentation) contain proprietary information; they are provided under a license agreement containing restrictions on use and disclosure and are also protected by copyright, patent, and other intellectual and industrial property laws. Reverse engineering, disassembly, or decompilation of the Programs, except to the extent required to obtain interoperability with other independently created software or as specified by law, is prohibited.

The information contained in this document is subject to change without notice. If you find any problems in the documentation, please report them to us in writing. This document is not warranted to be error-free. Except as may be expressly permitted in your license agreement for these Programs, no part of these Programs may be reproduced or transmitted in any form or by any means, electronic or mechanical, for any purpose.

If the Programs are delivered to the United States Government or anyone licensing or using the Programs on behalf of the United States Government, the following notice is applicable:

U.S. GOVERNMENT RIGHTS

Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are "commercial computer software" or "commercial technical data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the Programs, including documentation and technical data, shall be subject to the licensing restrictions set forth in the applicable Oracle license agreement, and, to the extent applicable, the additional rights set forth in FAR 52.227-19, Commercial Computer Software--Restricted Rights (June 1987). Oracle Corporation, 500 Oracle Parkway, Redwood City, CA 94065.

The Programs are not intended for use in any nuclear, aviation, mass transit, medical, or other inherently dangerous applications. It shall be the licensee's responsibility to take all appropriate fail-safe, backup, redundancy and other measures to ensure the safe use of such applications if the Programs are used for such purposes, and we disclaim liability for any damages caused by such use of the Programs.

The Programs may provide links to Web sites and access to content, products, and services from third parties. Oracle is not responsible for the availability of, or any content provided on, third-party Web sites. You bear all risks associated with the use of such content. If you choose to purchase any products or services from a third party, the relationship is directly between you and the third party. Oracle is not responsible for: (a) the quality of third-party products or services; or (b) fulfilling any of the terms of the agreement with the third party, including delivery of products or services and warranty obligations related to purchased products or services. Oracle is not responsible for any loss or damage of any sort that you may incur from dealing with any third party.

PeopleSoft Recruiting and Admissions Documentation Updates for CS Bundle #20

Note. This document is an update to the *PeopleSoft Enterprise Recruiting and Admissions 8.9 PeopleBook*. It describes the Product Update ID #739494 that was posted to MetaLink3 in June 2009. Use this document in conjunction with your PeopleBook to maintain a complete set of documentation.

This document provides information related to updates and fixes delivered with CS Bundle #20. Specifically, it discusses changes related to how to:

- Set up search parameters for test score data.
- Purge test score suspense files.
- (NLD) Set up withdrawal action reasons.

Setting Up Search Parameters for Test Score Data

This section discusses the change to the **Ignore** option on the Search Parameters page.

Access the Search Parameters page (Student Recruiting, External Test Score Processing, Search/Match/Post Test Scores, Search Parameters or Student Admissions, External Test Score Processing, Search/Match/Post Test Scores, Search Parameters).

No Matches Found

New

Ignore: Ignore the unmatched record completely. The process retains the record in the suspense file with the post status of *awaiting search/match*.

Match(es) Found

One Match and Multiple Matches

Ignore: Ignore the suspense record that matched a record in your database. The process retains the record in the suspense file with the post status of *awaiting search/match*.

Note: The **Ignore** option is also available on the Search Params page (Student Admissions, Application/Transcript Loads, TS130, Search/Match/Post Process, Search Params). The functionality of the **Ignore** option on the Search Params page remains unchanged in this bundle.

Purging Test Score Suspense Files

This section discusses the changes to the External Test Score Purge page.

Page Used to Purge Suspense Files

Page Name	Object Name	Navigation	Usage
External Test Score Purge	SAD_TEST_PURGE	<ul style="list-style-type: none"> Student Recruiting, External Test Score Processing, External Test Score Purge Student Admissions, External Test Score Processing, External Test Score Purge 	Purge suspense records and test score messages for a specific test ID.

External Test Score Purge page

Purge Option for All Rows

The system enables this group box when you select the **All Suspense Rows** option.

All Suspense Rows Select this option to purge all the suspense records.

Rows Loaded before or on Select this option and enter a date to purge all suspense records that were loaded on or before the specified date.

Use the **Date Loaded** field on the Test Score Suspense Data page to see when you loaded a record.

Suppose you loaded records on May 10, 2009. Subsequently, you loaded another set of records on May 15, 2009. If you select the **Rows Loaded before or on** option and specify the date as May 15, 2009, the purge process deletes all suspense records that were loaded on May 15, 2009 and May 10, 2009.

Purge Option for Marked Rows

The system enables this group box when you select the **Marked Suspense Rows** option.

- All Marked Suspense Rows** Select this option to purge all the records in your suspense table that are marked *Purge* in the **Post** field of the Test Score Suspense Data page.
- Rows Loaded before or on** Select this option and enter a date to purge only those suspense records that were loaded on or before the specified date and that are marked *Purge* in the **Post** field of the Test Score Suspense Data page.
- Suppose you loaded records on May 10, 2009. Subsequently, you loaded another set of records on May 15, 2009. If you select the **Rows Loaded before or on** option and specify the date as May 15, 2009, the purge process deletes the suspense records marked *Purge* that were loaded on May 15, 2009 and May 10, 2009.

(NLD) Setting Up Withdrawal Action Reasons

This section discusses two new setup pages, Admissions Program Action & Studielink Status Mapping and Student Records Program Action & Studielink Status Mapping, which enable you to map program actions and action reasons for withdrawals to Studielink statuses and end reasons.

- For the mapping, the program action is a required field but action reason is an optional field.
- When Studielink sends message 35 that contains a Studielink end reason and Studielink status, the system updates the Campus Solutions application or student records enrollment record with the mapped program action and action reason. For example, suppose you have mapped program action *WADM* and action reason *DEAT* to Studielink status *U* and end reason *8*. When message 35 that contains the values *U* and *8* is received, the system updates the corresponding application record with the program action *WADM* and action reason *DEAT*.
- You should map each Studielink status to a Campus Solutions program action with the Inbound Default check box selected (action reason is not required). If the Generate Studielink Message process cannot find a mapped program action based on the Studielink status and Studielink end reason, then it selects the default Campus Solutions program action for the Studielink status. This means that your setup may have multiple program actions marked as default. For example, suppose you have mapped program action *WADM* to Studielink status *U* with no end reason and action reason mapping. You have selected the Inbound Default check box for this mapping. When message 35 is received that contains the Studielink status *U* and end reason *8*, the system updates the corresponding application record with the program action *WADM* and leaves the action reason empty.
- The Generate Studielink Message process uses this mapping to generate the 31G (Withdrawal Confirmed) and 31E (Discontinuation Allowed) outbound messages.
- For 31G, the process first selects the program action and the action reason in the Campus Solutions application record. Then, it retrieves the end reason, Studielink status, and the Request for refund value that has been mapped to the selected program action and action reason.

- For 31E, the process first selects the program action and action reason from the Student Program/Plan record. Then, it retrieves the end reason and Studielink status that has been mapped to the selected program action reason. If a row does not exist in the Academic Prog Higher Education page, then the process inserts a row with a Prog Action Higher Ed value that has been mapped to the selected program action reason.
- When changing the program action (and action reason) in the Campus Solutions application record, the system derives the Studielink status value on the Application Regional page from the Admissions Program Action & Studielink Status Mapping page.
- You should include program action COMP in the Student Records Program Action & Studielink Status Mapping page only to process the outbound message 31E. The COMP program action should not be used for inbound (default) processing.

Note that Admission Withdrawal Action and Records Withdrawal Action fields have been removed from the Studielink Load Parameters page. These fields have been removed because now the system uses the new mapping pages to update the application or student records enrollment record with a program action when Studielink sends message 35.

Pages Used to Set Up Withdrawal Action Reasons

Page Name	Object Name	Navigation	Usage
Admissions Program Action & Studielink Status Mapping	SAD_SL_ADM_RSN	Student Admissions, Processing Studielink NLD, Setup Studielink, Withdrawal Action Mapping, Admissions Setup	Map Campus Solutions program action reason values to the Studielink end reason and Studielink status values. The system uses this mapping for applicants when it receives message 35 and when it generates message 31G or 31E for applicants
Student Records Program Action & Studielink Status Mapping	SAD_SL_PRG_RSN	Student Admissions, Processing Studielink NLD, Setup Studielink, Withdrawal Action Mapping, Student Records Setup	Map Campus Solutions program action reason values to the Studielink end reason, Studielink status and Prog Action HE values. The system uses this mapping for students when it receives message 35 and when it generates message 31E for students.

Setting Up Withdrawal Action Reasons For Applicants
